

Use Mobil Delvac Heavy-Duty Diesel Engine Oils to Help Protect Your Truck and Equipment the Right Way.

As a proud, professional contractor, you know the value of using quality equipment. You know that using quality tools will help you get the job done right, enhancing your business and reputation with customers.

You also know that if you don't maintain your tools and equipment properly, your business could be adversely impacted, costing you time and money.

So when it comes to protecting your truck – one of your most important and expensive pieces of equipment – make sure you do the right thing and choose high-performance Mobil Delvac heavy-duty diesel engine oil.

For more than 80 years, Mobil Delvac has been helping construction contractors, agriculture professionals, landscapers and truckers to help extend the life of their vehicles' engines.

With its unique formulation, Mobil Delvac can help deliver performance beyond the boundaries of conventional oils because its composition includes Trimer Core chemistry – a powerful additive technology that resists oil degradation, reduces sludge buildup and prevents wear, ultimately extending drain intervals and engine life.

Whether you are on the road or on the job site, you can benefit from the proven performance of Mobil Delvac because it is designed for use in all types of diesel-powered vehicles – from big Class 8 trucks, to heavy equipment, to powerful diesel pickups.

That's why every day, at truck stops nationwide, professional long-haul truckers select Mobil Delvac more often than any other oil. That's why the world's five largest heavy-duty equipment manufacturers choose Mobil Delvac technology.

And that's why Mobil Delvac is the brand of oil that GM chooses for use in GM Duramax engines.

As a proud, professional contractor, you know the value of using quality equipment. Now, you know that Mobil Delvac heavy-duty diesel engine oils are the right choice to protect your trucks and equipment.

Remember to ask for Mobil Delvac wherever you get your oil changed or at any auto parts store.

Because if you don't protect your equipment . . . no one will.
